Product Information & Catalog

W E L C O M E

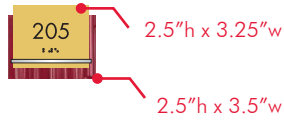

idsolutions is an architectural graphics company dedicated to developing your signage needs. We help you determine a signage package that not only works with the designed space but also is functional to the needs of any client. In this brochure you will find our creative sign collections and their sign types. Each sign can be customized with hundreds of options of colors, finishes and material selections. Our customer friendly staff is here to help you through the process of determining what signage is necessary and will best suit your decor. We look forward to working with you and being your partner through this process. Welcome to **idsolutions**...

you are here.

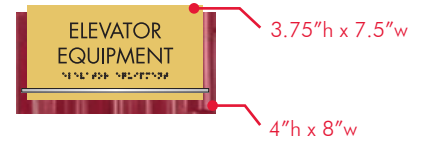

Warmest Regards,

NOTES:

- Workstation signage comes with a cd which includes the template to print your inserts. You can print them from your laser or ink jet printer using the Microsoft Office templates. *Some paper selections are available. Ask your sales representative today for more details.
- When printing your inserts, try to stay with a dark color, such as black, as printer ink or toner levels may vary each time you print.

Electronic Directories

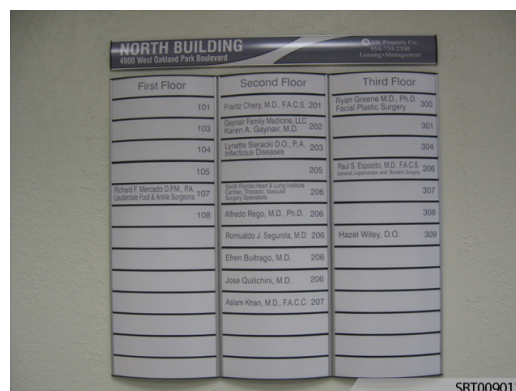

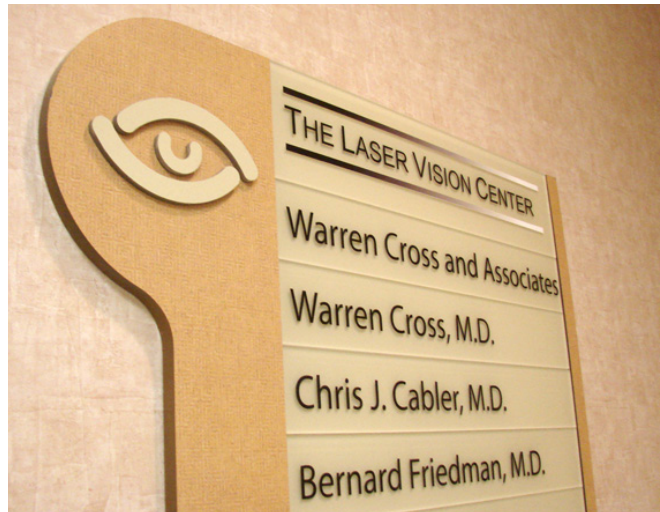

- Easy to change content
- Optional Streaming Internet News
- Full Color and Customizable
- Wall mounted or stand mounted

Custom Wayfinding

- Hundreds of colors and finishes to choose from
- Fully customizable to fit your decor or style
- Create a custom wayfinding system throughout your facility

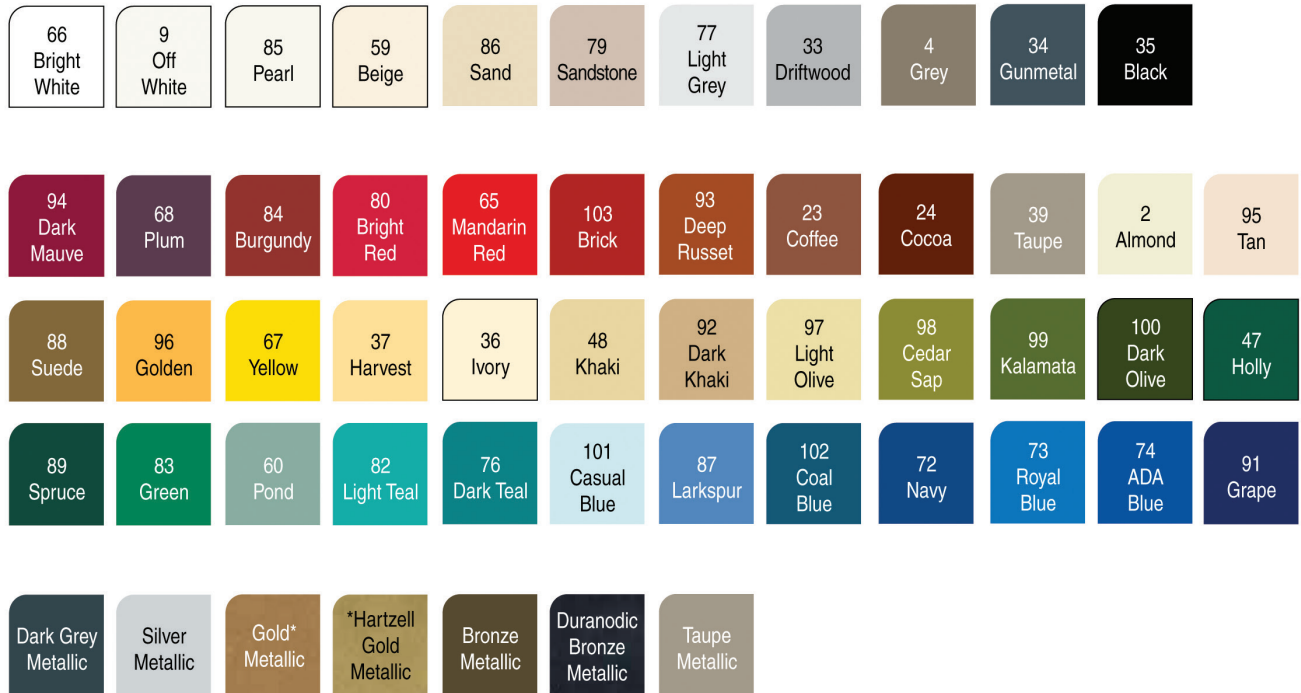

WAYFINDING

id solutions

COLOR SELECTIONS:

PHOTOPOLYMER

The colors below are standard photopolymer colors. We can match custom colors, such as Pantone Matching System (PMS) or brand paint colors, for an additional cost per color.

Where color precision is a prime consideration, request actual color samples. Colors shown here are representative only.

COLOR SELECTIONS: Z I N C

The colors below are standard zinc colors. We can match custom colors, such as Pantone Matching System (PMS) or brand paint colors, for an additional cost per color.

STANDARD TINT COLORS

Tint finishes will vary slightly from job to job. If you are attempting to match previously tinted signs, please provide a sample.

Texture and Sheen:

Most if not all paints are applied with a smooth (no texture) and a satin sheen. It is important to designate the texture and sheen of your choice by choosing from smooth, suede, or leatherette [aka pebble] textures; and from matte, satin, or gloss sheens. These are all standard options with our paints. We highly recommend a suede texture and satin sheen for background paint colors.

ANTIQUE BRASSTONE

ANTIQUE BRONZETONE

ANTIQUE COPPERTONE

ANTIQUE BNICKELTONE

STANDARD PAINT COLORS

White DX-01	Tan DX-04	Pearl DX-07	Smoke DX-10	Gray Blue DX-14	Royal Blue DX-17	Emerald Green DX-22	Grape DX-26

Where color precision is a prime consideration, request actual color samples. Colors shown here are representative only.

RECEPTION AND BRAND SIGNS

- Many paint and finish selections
- Show your brand and dress up a reception space

ACCENT PIECES

Backplates or accent pieces of a sign can be made from several materials with hundreds of color and finish selections. From acrylic to zinc to 3Form, **idsolutions** can customize your accent piece to match your decor. Select from WilsonArt Laminates and 3Form resins as well as select acrylic and zinc colors from the standard color chart, or select your own custom color.

RESINS

Visit www.3-form.com for product descriptions and color selections

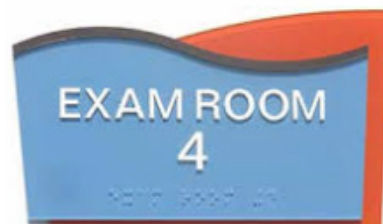

Minimum order required on all non-standard finishes.

LAMINATES
